sql, posgress, mongoDB, redis

DevOps

Nginx, Docker, Bash, gitlab CI

English

B2

# Education

## Perm State Humanitarian Pedagogical University

*2010 - 2016 Master's degree, Information Science Education*

Grade: 9.4

Result-oriented web developer for over 9 years with 8 years of experience as frontend and 5 years as full-stack. During this time I have finished a lot of big projects. It was CRM, user profiles, administration services, integration systems, multi-room chats, and so on. I would like to work in a product team. I am big on working with flexible methodologies, like agile with scrum and kanban approaches. I prefer to automize everything, enthusiastic to educate people.

## Experience

2022 - present

### JS Full-Stack Developer

*Rage on wheels*

- Engaged in a significant play-to-earn cryptocurrency project, contributing to its overall development and success.
- Successfully refactored the existing legacy codebase, enhancing efficiency and maintainability.
- Implemented Walletconnect v2 authentication and developed a parser for Ethereum blocks using web3 and web sockets, improving overall connectivity and data handling.
- Conducted a comprehensive system audit and integrated the findings with Telegram for streamlined reporting.
- Designed and developed an internal NFT marketplace, statistics page, and crafting system, providing valuable tools for user engagement.
- Configured and managed GitLab Continuous Integration (CI) to ensure seamless code deployment and testing.

2020 - 2022

## IT Mentor

*Self-employed*

- Collaborate with various developers, sharing knowledge and experience to successfully tackle complex tasks and meet stringent deadlines.
- Engage with major clients, focusing on optimizing architecture and performance to meet their unique needs and demands.
- Occasionally undertake freelance projects to develop Minimum Viable Products (MVPs) or troubleshoot functional issues, applying my expertise in a flexible and responsive manner.

2020

## JS, PHP Full-Stack Developer

*Merlion*

- Developed the frontend components of a big-data service tailored for federal wholesale and B2B stores, enhancing user experience and functionality.
- Modernized numerous legacy React class components by updating them to hook components, improving performance and maintainability.
- Authored automated UI, end-to-end, and regression tests, ensuring quality control and stability of the application.
- Actively participated in Scrum activities, contributing to agile development and collaboration within the team.

2018 - 2020

## JS, React and Node.js developer

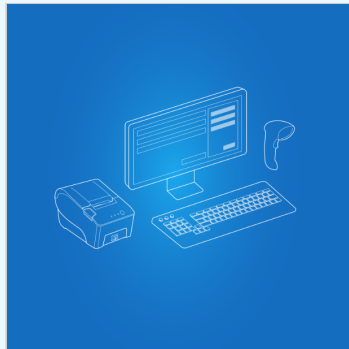

*Codabra*

- I have created inner admin platform for provision of educational process. There are CRUD with big data, google calendar like schedule and salary calculator in this service
- I have created also outer user profile for pupils with information about course, workflow, kanban dashboard and group chat.
- The interactive showcase <https://codabra.org/schedule/msk>
- System for forms integration with AMO CRM
- Module for integration of slack with the user and lead activity

**КОДАБРА**

2017 - 2018

## JS, React developer

*InitGroup cash-box decisions*

- Developed inner CRM system
- Developed cash-box software with 2 iterations.

2016 - 2017

## JS, Yii, PHP, React developer

*CkDigital*

- I was creating different sites and services
- There were a lot of middle outsource projects, like safe-sharing service and a couple of markets
- Also I have made a big addon for asana app. There is calculate KPI for employees in this addon.

2013 - 2016

## Engineering Technician

*Perm State Pedagogical University*

- Administration of different services. Support of computer's classes.
- There was a plenty of time in this job where I had a side-work as IT freelancer
- Made some web layout and created small application by PHP, Yii2
